

Target Market Determination – Funds Management

Legal disclaimer

This Target Market Determination (TMD) is required under section 994B of the *Corporations Act 2001* (Cth) (**the Act**). It sets out the class of consumers for whom the product, including its key attributes, would likely be consistent with their likely objectives, financial situation and needs. In addition, the TMD outlines the triggers to review the target market and certain other information. It forms part of Gold Corporation's design and distribution arrangements for the product.

This document is not a product disclosure statement and is **not** a summary of the product features or terms of the product. This document does not take into account any person's individual objectives, financial situation or needs. Persons interested in acquiring this product should carefully read the Product Disclosure Statement (**PDS**) for Perth Mint Gold Structured Product ASX:PMGOLD before making a decision whether to buy this product.

Important terms used in this TMD are defined in the TMD Definitions which supplement this document. Capitalised terms have the meaning given to them in the product's PDS, unless otherwise defined. The PDS can be obtained by visiting The Perth Mint website at <https://www.perthmint.com/invest/perth-mint-gold-asx-pmgold/> or contacting The Perth Mint Depository via phone on 08 9421 7250 or via email at pmds@perthmint.com.

Target market summary

This product is likely to be appropriate for a consumer seeking capital growth or capital preservation, to be used as a core component or satellite allocation within a portfolio where the consumer has a medium to long-term investment timeframe, medium to high risk return profile and needs daily access to capital.

Fund and issuer identifiers

Issuer	Gold Corporation
Issuer ABN	98 838 298 431
Issuer AFSL	N/A – as an agent of the Crown Gold Corporation is not required to have an AFSL
Fund	Perth Mint Gold Structured Product
ARSN	n/a
APIR Code	n/a
ISIN Code	n/a
Market Identifier Code	ASX:PMGOLD
Product Exchange code	ASX:PMGOLD
Date TMD approved	26 March 2025
TMD Version	v1.1
TMD Status	Current

Description of target market

This part is required under section 994B(5)(b) of the Act.

TMD indicator key

The Consumer Attributes for which the product is likely to be appropriate have been assessed using a red/amber/green rating methodology with appropriate colour coding:

In target market	Potentially in target market	Not considered in target market
------------------	------------------------------	---------------------------------

Instructions

In the tables below, Column 1, Consumer Attributes, indicates a description of the likely objectives, financial situation and needs of the class of consumers that are considering this product. Column 2, TMD indicator, indicates whether a consumer meeting the attribute in column 1 is likely to be in the target market for this product.

Generally, a consumer is unlikely to be in the target market for the product if:

- **one or more** of their Consumer Attributes correspond to a **red** rating, or
- **three or more** of their Consumer Attributes correspond to an **amber** rating.

Investment products and diversification

A consumer (or class of consumer) may intend to hold a product as part of a diversified portfolio (typically with an intended product use of *satellite/small allocation* or *core component*). In such circumstances, the product should be assessed against the consumer's attributes for the relevant portion of the portfolio, rather than the consumer's portfolio as a whole. For example, a consumer may seek to construct a conservative portfolio with a satellite/small allocation to growth assets. In this case, it may be likely that a product with a *High* or *Very High* risk/return profile is consistent with the consumer's objectives for that allocation notwithstanding that the risk/return profile of the consumer as a whole is *Low* or *Medium*. In making this assessment, distributors should consider all features of a product (including its key attributes).

Consumer Attributes	TMD Indicator	Product description including key attributes
<i>[A description of the likely objectives, financial situation and needs of the class of consumers in the target market]</i>		
Consumer's investment objective		
Capital Growth		The product aims to track the price of gold unhedged in Australian dollars, less applicable management fees.
Capital Preservation		
Capital Guaranteed		
Income Distribution		
Consumer's intended product use (% of Investable Assets)		
Solution/Standalone (75-100%)		The fund is 100% invested in gold. The intended product use can therefore be categorised as solution/standalone, core component or satellite/small allocation, depending on the consumers desired gold allocation in their portfolio.
Core Component (25-75%)		
Satellite/small allocation (<25%)		
Consumer's investment timeframe		
Short (≤ 2 years)		The product offers daily liquidity via the ASX, while gold itself is a highly liquid asset. Gold has also historically delivered strong long-term returns (+8% p.a.) and been uncorrelated to equities, providing diversification benefits for conservative through to high risk investors. As such, it can be an appropriate investment for consumers irrespective of their timeframe.
Medium (> 2 years)		
Long (> 8 years)		

Consumer Attributes	TMD Indicator	Product description including key attributes
<i>[A description of the likely objectives, financial situation and needs of the class of consumers in the target market]</i>		
Consumer's Risk (ability to bear loss) and Return profile		
Low		Gold has historically exhibited similar volatility to the equity market, though it is traditionally negatively correlated to equities. Given this profile, the product can be an appropriate holding for all consumers, irrespective of their risk profile.
Medium		
High		
Very High		
Consumer's need to withdraw money		
Daily		The product offers daily liquidity via the ASX, while gold itself is a highly liquid asset (daily turnover in excess of USD 160 billion per day). As such, the product is appropriate for use for consumers who need access to money on a daily through to annual timeframe, as the product can be liquidated for cash easily.
Weekly		
Monthly		
Quarterly		
Annually or longer		

Appropriateness

Note: This section is required under RG 274.64–66.

The Issuer has assessed the product and formed the view that the product, including its key attributes, is likely to be consistent with the likely objectives, financial situation and needs of consumers in the target market as described above, as the features of this product in Column 3 of the table above are likely to be suitable for consumers with the attributes identified with a green TMD Indicator in Column 2.

Distribution conditions/restrictions

This part is required under section 994B(5)(c) of the Act.

Distribution Condition	Distribution Condition Rationale	Applicable
There are no distribution conditions.	Not applicable.	✓

Review triggers

This part is required under section 994B(5)(d) of the Act.

Material change to key attributes, fund investment objective and/or fees.
Material deviation from benchmark / objective over sustained period.
Key attributes have not performed as disclosed by a material degree and for a material period.
Determination by the issuer of an ASIC reportable Significant Dealing.
Material or unexpectedly high number of complaints (as defined in section 994A(1) of the Act) about the product or distribution of the product.
The use of Product Intervention Powers, regulator orders or directions that affects the product.

Mandatory review periods

This part is required under section 994B(5)(e) and (f) of the Act.

Review period	Maximum period for review
Initial review	1 year and 3 months
Subsequent review	3 years and 3 months

Distributor reporting requirements

This part is required under section 994B(5)(g) and (h) of the Act.

Reporting requirement	Reporting period	Which distributors this requirement applies to
Complaints (as defined in section 994A(1) of the Act) relating to the product design, product availability and distribution. The distributor should provide all the content of the complaint, having regard to privacy.	Within 10 business days following end of calendar quarter.	All distributors

If practicable, distributors should adopt the FSC data standards for reports to the issuer. Distributors must report to Gold Corporation using the email address pmds@perthmint.com.

Important information

This Target Market Determination (TMD) is made by Gold Corporation ABN 98 838 298 431. Gold Corporation is the issuer of PMGOLD.

The material provided here is for general information only and does not take account of any investor's personal financial situation or needs. The information in this material is thus not a recommendation, offer or solicitation to buy or sell any securities or to adopt any investment strategy. The opinions expressed may change as subsequent conditions vary. To the extent permitted by law, neither of Gold Corporation nor any of its respective related bodies corporate, associates, and employees, shall have any liability whatsoever (in negligence or otherwise) for any loss however arising from any use of the material or otherwise in connection with this TMD.

Any views expressed are the views of Gold Corporation and do not constitute investment advice. To the extent this material constitutes general financial product advice, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to the investor's objectives, financial situation and needs. Before making any investment decision, an investor should obtain financial advice that takes into consideration their personal circumstances. Gold Corporation, its officers, employees and agents are of the view that the information in this material and the sources being relied on (which may include third party sources) are correct (as at the date of publication). While care has been taken in preparing this material, no warranty of accuracy or reliability is given and no responsibility for the information is accepted by Gold Corporation. To the extent permitted by law, no liability is accepted for any loss or damage as a result of reliance on this information.

Neither Gold Corporation nor any of its related bodies corporate guarantee the performance of PMGOLD, any particular rate of return or return of capital. An investment in PMGOLD is subject to investment risks, including the risk of the loss of principal invested. Please refer to the product disclosure document for the specific risks associated with investing in the fund. Past performance is not a reliable indicator of future performance.

This material is not to be distributed or used by a person or entity in any jurisdiction or country where distribution or use would be contrary to local law or regulation.

Definitions

Term	Definition
Consumer's investment objective	
Capital Growth	The consumer seeks to invest in a product designed to generate capital return. The consumer prefers exposure to growth assets (such as shares or property) or otherwise seeks an investment return above the current inflation rate.
Capital Preservation	The consumer seeks to invest in a product to reduce volatility and minimise loss in a market down-turn. The consumer prefers exposure to defensive assets (such as cash or fixed income securities) that are generally lower in risk and less volatile than growth investments.
Capital Guaranteed	The consumer seeks a guarantee or protection against capital loss whilst still seeking the potential for capital growth (typically gained through a derivative arrangement). The consumer would likely understand the complexities, conditions and risks that are associated with such products.
Income Distribution	The consumer seeks to invest in a product designed to distribute regular and/or tax-effective income. The consumer prefers exposure to income-generating assets (typically, high dividend-yielding equities, fixed income securities and money market instruments).
Consumer's intended product use (% of Investable Assets)	
Solution/Standalone (75-100%)	The consumer intends to hold the investment as either a part or the majority (up to 100%) of their total <i>investable assets</i> (see definition below). The consumer typically prefers exposure to a product with at least High <i>portfolio diversification</i> (see definitions below).
Core Component (25-75%)	The consumer intends to hold the investment as a major component, up to 75%, of their total <i>investable assets</i> (see definition below). The consumer typically prefers exposure to a product with at least Medium <i>portfolio diversification</i> (see definitions below).
Satellite (<25%)	The consumer intends to hold the investment as a smaller part of their total portfolio, as an indication it would be suitable for up to 25% of the total <i>investable assets</i> (see definition below). The consumer is likely to be comfortable with exposure to a product with Low <i>portfolio diversification</i> (see definitions below).
Investable Assets	Those assets that the investor has available for investment, excluding the residential home.
Portfolio diversification (for completing the key product attribute section of consumer's intended product use)	
Low	Single asset class, single country, low or moderate holdings of securities - e.g. high conviction Aussie equities.
Medium	1-2 asset classes, single country, broad exposure within asset class, e.g. Aussie equities "All Ords".
High	Highly diversified across either asset classes, countries or investment managers, e.g. Australian multi-manager balanced fund or global multi-asset product (or global equities).
Consumer's intended investment timeframe	
Short (\leq 2 years)	The consumer has a short investment timeframe and may wish to redeem within two years.
Medium (> 2 years)	The consumer has a medium investment timeframe and is unlikely to redeem within two years.
Long (> 8 years)	The consumer has a long investment timeframe and is unlikely to redeem within eight years.
Consumer's Risk (ability to bear loss) and Return profile	

Issuers should undertake a comprehensive risk assessment for each product. The FSC recommends adoption of the Standard Risk Measure (**SRM**) to calculate the likely number of negative annual returns over a 20 year period, using the guidance and methodology outlined in the **Standard Risk Measure Guidance Paper For Trustees**. SRM is not a complete assessment of risk and potential loss. For example, it does not detail important issues such as the potential size of a negative return or that a positive return could still be less than a consumer requires to meet their investment objectives/needs. Issuers may wish to supplement the SRM methodology by also considering other risk factors. For example, some products may use leverage, derivatives or short selling, may have liquidity or withdrawal limitations, or otherwise may have a complex structure or increased investment risks, which should be documented together with the SRM to substantiate the product risk rating. A consumer's desired product return profile would generally take into account the impact of fees, costs and taxes.

Term	Definition
Low	The consumer is conservative or low risk in nature, seeks to minimise potential losses (e.g. has the ability to bear up to 1 negative return over a 20 year period (SRM 1 to 2)) and is comfortable with a low target return profile. Consumer typically prefers defensive assets such as cash and fixed income.
Medium	The consumer is moderate or medium risk in nature, seeking to minimise potential losses (e.g. has the ability to bear up to 4 negative returns over a 20 year period (SRM 3 to 5)) and comfortable with a moderate target return profile. Consumer typically prefers a balance of growth assets such as shares, property and alternative assets and defensive assets such as cash and fixed income.
High	The consumer is higher risk in nature and can accept higher potential losses (e.g. has the ability to bear up to 6 negative returns over a 20 year period (SRM 6)) in order to target a higher target return profile. Consumer typically prefers predominantly growth assets such as shares, property and alternative assets with only a smaller or moderate holding in defensive assets such as cash and fixed income.
Very high	The consumer has a more aggressive or very high risk appetite, seeks to maximise returns and can accept higher potential losses (e.g. has the ability to bear 6 or more negative returns over a 20 year period (SRM 7) and possibly other risk factors, such as leverage). Consumer typically prefers growth assets such as shares, property and alternative assets.
Consumer's need to withdraw money	
Issuers should consider in the first instance the redemption request frequency under ordinary circumstances. However, the redemption request frequency is not the only consideration when determining the ability to meet the investor's requirement to access capital. To the extent that the liquidity of the underlying investments or possible liquidity constraints (e.g. ability to stagger or delay redemptions) could impact this, this is to be taken into consideration in completing this section.	
Daily/Weekly/Monthly/Quarterly/Annually or longer	The consumer seeks to invest in a product which permits redemption requests at this frequency under ordinary circumstances and the issuer is typically able to meet that request within a reasonable period.
Distributor Reporting	
Significant dealings	<p>Section 994F(6) of the Act requires distributors to notify the issuer if they become aware of a significant dealing in the product that is not consistent with the TMD. Neither the Act nor ASIC defines when a dealing is 'significant' and distributors have discretion to apply its ordinary meaning.</p> <p>The issuer will rely on notifications of significant dealings to monitor and review the product, this TMD, and its distribution strategy, and to meet its own obligation to report significant dealings to ASIC.</p> <p>Dealings outside this TMD may be significant because:</p> <ul style="list-style-type: none"> • they represent a material proportion of the overall distribution conduct carried out by the distributor in relation to the product, or • they constitute an individual transaction which has resulted in, or will or is likely to result in, significant detriment to the consumer (or class of consumer). <p>In each case, the distributor should have regard to:</p> <ul style="list-style-type: none"> • the nature and risk profile of the product (which may be indicated by the product's risk rating or withdrawal timeframes), • the actual or potential harm to a consumer (which may be indicated by the value of the consumer's investment, their intended product use or their ability to bear loss), and • the nature and extent of the inconsistency of distribution with the TMD (which may be indicated by the number of red or amber ratings attributed to the consumer). <p>Objectively, a distributor may consider a dealing (or group of dealings) outside the TMD to be significant if:</p> <ul style="list-style-type: none"> • it constitutes more than half of the distributor's total retail product distribution conduct in relation to the product over the reporting period, • the consumer's intended product use is <i>Solution / Standalone</i>, or • the consumer's intended product use is <i>Core component</i> and the consumer's risk (ability to bear loss) and return profile is <i>Low</i>.
